

## Pearl Harbor FISC PFAS Groundwater Sampling Results

The table below shows validated sampling results for PFAS constituents in groundwater at Pearl Harbor FISC as of June 30, 2023. These samples were collected and analyzed under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) by the Department of the Navy Environmental Restoration Program. This data is being provided for informational purposes only. Evaluation of the data is not final. The evaluation of the groundwater sample results will be considered final when the Site Inspection report is completed. When completed, the final report outlining the evaluation of the data will be available in the installation administrative record, which can be found here: <https://go.usa.gov/xhDyc>. Definitions for table columns can be found at the bottom of the table.

Installation Name	Sample Date	Field Sample ID	Analysis Method	CAS Number	Analyte Name	Analyte Abbreviation	Final Result	Limit of Detection	Final Units	Final Qualification

**Installation Name** – Name of installation where groundwater samples were collected

**Sample Date** – Date on which the sample was collected

**Field Sample ID** – Unique name assigned to sample collected

**Analysis Method** – Laboratory method to conduct sample analysis

**CAS Number** – Numeric identifier for a specific chemical

**Analyte Name** – Name of the chemical analyzed by the laboratory

**Analyte Abbreviation** – Abbreviated name of the chemical analyzed by the laboratory

**Final Result** – The analyte concentration value generated after a sample has been analyzed

**Limit of Detection** – The smallest amount or concentration of a substance that must be present in a sample in order to be detected

**Final Units** – Unit of measure for the analyte value (NG/L = nanograms per liter)

**Final Qualification** – Final qualifier code assigned to the result by the laboratory

**Final Qualification Key:**

J = The reported result was an estimate value.

U = The analyte was not detected and was reported as less than the Limit of Detection (LOD). The LOD has been adjusted for any dilution or concentration of the sample.

UJ = The analyte was not detected and was reported as less than the Limit of Detection (LOD). However, the associated numerical value is approximate.
